

Argentina – Strategy

February 7, 2023

Argentina Morning View

- **IN A NUTSHELL:** The JxC leadership released a statement yesterday warning about the government's financing strategy and zeroing in on the instability of the ARS debt. While the opposition economist stopped just short of judging the ARS burden unsustainable, they warned about the risks of a "chaotic" outcome. Welcome to the beginning of the 2023 Presidential Campaign. It might get ugly.
- **RATIONALE:** For some time, we've been hammering that Mr. Guzman had created an unsustainable situation in the ARS market. While the total debt doesn't look unsustainable if you look at its real interest costs (less than 1% of GDP) or its total size (26% of GDP, including the zero-interest bearing BCRA short-time loans), its short duration and high indexation results in maturities adding up to multiple times base money. In other words, the ARS burden is only sustainable under accelerating inflation and increasing financial repression, tightening capital controls further. Keeping up with the maturity profile requires forcing the private sector into remaining long ARS or abusing seigniorage to compensate for the rollover gap.

Faced with this outlook, the evolution of the ARS market has become a political issue. The market has repeatedly rejected buying securities maturing after the October 2023 Presidential election. Moreover, to keep the ARS market running over 2H22, the government has had to (i) give away an FX put, allowing creditors to swap their inflation linkers for USD-L paper, and (ii) allow creditors to reduce their exposure to Treasury debt and increase their holdings of CenBank debt (either directly or indirectly through CDs). Still, investors continue to assign a substantial credit risk on post-election Treasury paper. The problem is that there's little the government can do for the rollover ratio by fiddling with the engineering of the auctions. In our view, the only credible way to shore up the ARS market is to have the government and opposition agree that the next Administration will assume the costs of persistent inflation and capital controls to remain current with the maturity schedule.

Suffice to say that the opposition has few incentives to agree to such a deal. For starters, the government has very little to offer in exchange (especially because everyone in the FdT, including Alberto Fernandez, the Kirchners, and, to a less obvious extent, Mr. Massa, are already campaigning). Second, the opposition perceives that it might gain from a blow-up of the ARS market in the months before the election. In this context, we're not surprised to read last night's statement by the leadership of JxC about the risks around the government's financing strategy and effectively warning creditors that they play the ARS market game at their own risk.

In our view, the statement ([link here](#)) has three core ideas. The first comes right out of the gate, as the header of the message warns that the government has set up a bomb that risks leading to a situation substantially worse than that of 2015. The second addresses the sustainability of the ARS debt, arguing that "the JxC leadership expressed itself against the abuse of USD-L securities with rates which will prove impossible to pay, or in hard currency at usury rates." The gist of the argument is that the government's been dealing with a financing crisis since June 2022 and that it's been trying to muddle through it by having the BCRA print about 2.3% of GDP to rescue Treasury paper, violating the financing limits enforced by the CenBank's charter and by running a series of debt swaps which are increasingly resulting in shorter tenors, more dollarized debt, and higher rates. The JxC leadership argues that the government is not trying to make the ARS market stable but merely extend its agony until after the election so that it blows up in the next Administration's face. The first two ideas of the statement aren't new. JxC politicians like Mr. Macri, Mrs. Bullrich, and Mr. Laspina have already gone on the record with similar thoughts. The third idea, however, is new, arguing that the government's strategy may result in a chaotic outcome with substantial social costs.

The third idea signals a shift in the JxC position. We've been arguing for some time that JxC had the power to derail Mr. Massa's program but that it would pay a cost for it. It's a calculated gamble. Unlike the 2016 program, which sought to shock the economy positively by reopening the FX market immediately and delaying the fiscal consolidation as much as possible, the 2024 JxC economic program is substantially more painful by turning things around. A JxC Administration would more likely shock the primary deficit into a balance during its first year but maintain the FX market controls initially and ease them gradually. A world of pain. To make such a program viable politically, JxC needs voters to take the pain as the necessary remedy to the unbridled chaos that came before it. In other words, the JxC program is predicated on the ARS market blowing up under Mr. Fernandez's watch.

This situation forces JxC into taking a calculated risk. The first best for the opposition would have been the ARS market blowing up because of the government's incompetence. After all, no JxC candidate wants to appear in the picture holding the detonator. While we were very close to that happening in July, Mr. Massa and his team have averted that risk. Mr. Massa may not have solved the ARS market problems, but he has been able to muddle through the crisis much more competently than the market consensus expected a few months ago. He has ensured that the government will make it with limited ARS rollover problems until 2Q23, though he has not been able to chart a path to navigate the 2Q maze. In this context, the JxC leadership sees that it can no longer just sit tight until the government screws up and decides to take matters into its own hands.

For the time being, the JxC leadership has stopped short of saying that it would restructure the ARS debt. Still, when you read between the lines of the release, the idea is crystal clear. The risk of pushing the market past the brink is that voters may turn alienated towards an emergent like Mr. Milei. In our view, the JxC leadership is counting on Mr. Milei having even more extreme thoughts about the ARS debt (and the ARS in general), limiting the damage. Ultimately, the JxC leadership seems to be gambling that with Mr. Milei at a corner (it would be extremely out of character if the Libertarian candidate came out defending the government's ARS financing strategy), if they can saddle the government with the blame for the inflationary and social costs of a blow up in the ARS market, they would create a fertile ground for building a robust majority in October and galvanize society from the pain of stabilizing the economy in 2024.

When we look at the market, this dynamic should result in a wider credit risk premium, a lower appetite for anything maturing after October, and a weaker rollover ratio. In other words, a nightmare for Mr. Massa at a time when his anti-inflation plan seems to be faltering. The writing has been on the wall for some time. Muddling through 2023 in the ARS market was never going to be easy. Still, just because we expected the risks we see materializing doesn't make the situation any less scary.

However, such information has not been independently verified by TPCG Valores SAU, and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. TPCG Valores SAU accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance. The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment.

Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances; investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

TPCG Valores SAU, and/or any of its affiliates, as well as their respective directors, executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in the document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of the report, to the extent permitted by the applicable law.

TPCG Valores SAU or any of its affiliates' salespeople, traders and other professionals may provide oral or written market Commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, TPCG Valores SAU, or any of its affiliates' proprietary trading and investing businesses, may make investment decisions that are inconsistent with the recommendations expressed herein.

No part of the document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted without the prior written consent of TPCG Valores SAU. No part of the report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

For U.S. persons only:

This report is a product of TPCG, which is the employer of the research analyst(s) who has prepared the informative report. The research analyst(s) preparing this report is/are resident(s) outside the United States (U.S.) and is/are not associated person(s) of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. broker-dealer and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with U.S. rules or regulations.
